Attention First, page 118, prompts 32-33

DESIGNING YOUR TEAMS, TOOLS, AND HUMAN-AI WORLD

Use this section to design the world around the learner, not just the information in front of them.

TOOL AND TEMPLATE INVENTORY

32. List 3–5 practical tools, templates, or supports in your system. What does each one help the learner build, decide, or navigate?

IDENTITY AND ROLE SUPPORT

33. Write 3 identity-building questions that help learners discover what they bring to the work.

Prompt 32: Tool and Template Inventory

1. Elias' engineering expertise are a support that can help interpret the data about what went technically wrong with the rogue command and robot in the QA cell.
2. The night-shift operator's account of the checks that were performed on the cell's operations could help us track any potential human errors in the system.
3. Various logs in the records terminal can be used to establish a timeline of events surrounding the QA cell incident.

Prompt 33: Identity Building Questions

1. What information have you acquired and need to present?
2. How does your department's expertise play into the operations in the QA cell?
3. Based on your expertise, what part of the QA cell operations could be improved to avoid another rogue command and robot incident?
