CIT 140 · Week 6 · System boundary

Replace prompts. Use W06-S01 for the system, external teams and data crossing the boundary. Keep internal stores on page 2. Add labeled connectors.

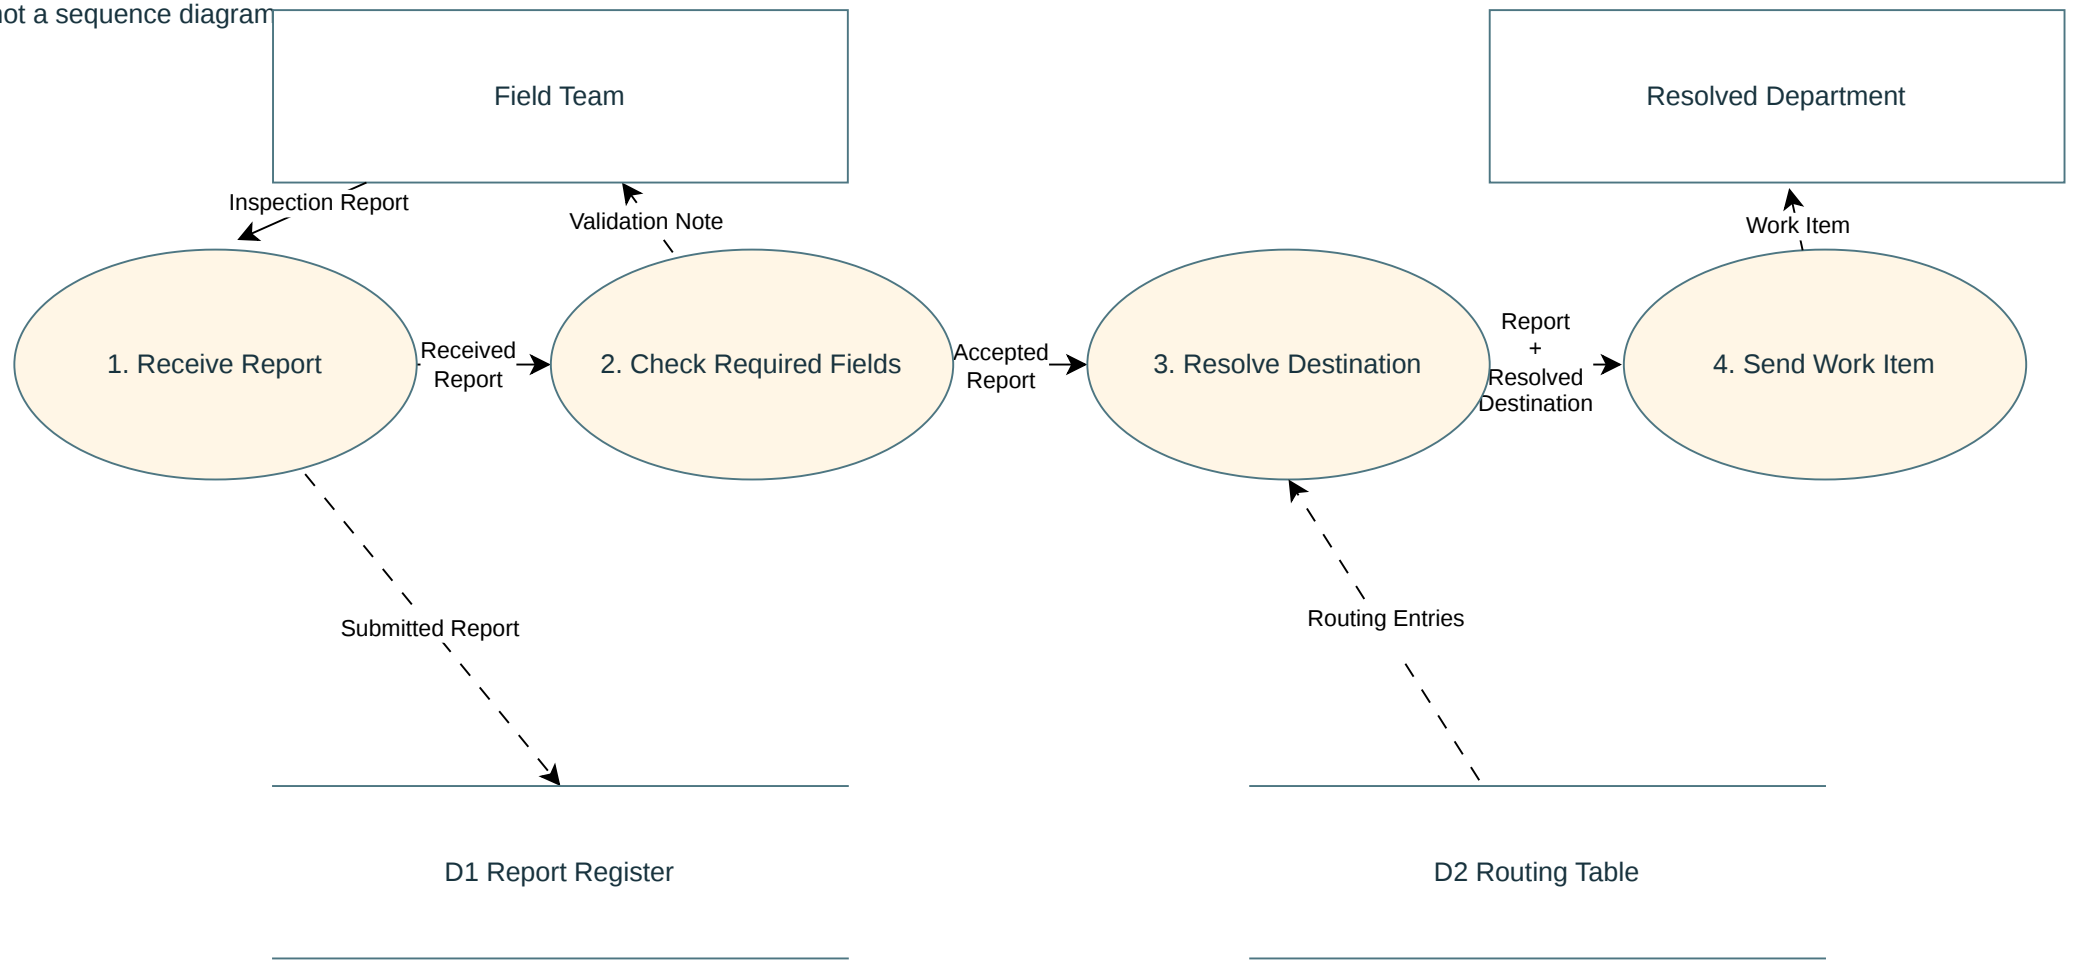

Inside: [work inside boundary]The Inspection Report Routing System's inner work include everything that happens *after* the Field team supplies an inspection report and *up to the moment* a final validated and accepted report is delivered to its resolved department as a work item.

Outside: Field Team does the work in conducting the inspection's that generate a report, but is itself outside of the Inspection Report Routing System. Flight control, physical inspections, and table maintenance for the Routing table are recipients of information exported from the system but are not part of the Inspection Report Routing System's inner workings.

Sources: [IDs]W06-S01

CIT 140 · Week 6 · Information movement

Use W06-S01. Connect the four processes, two stores and external teams. Label arrows with data; balance external flows with page 1. The starter positions are a layout aid, not a sequence diagram

[Add external teams and all data flows supported by W06-S01. Cite the source IDs. Check inputs and outputs for each process.]

CIT 140 · Week 6 · Definitions and finding

Complete every column for the eight fields. Replace prompts with short answers. Use the same fields as W06-S02.

Field	Meaning	Example	Allowed value / format	Source
report_id	Unique report reference	**CJ-601**	CJ- followed by three digits.	W06-S02
asset_id	Reference for the inspected asset	SL-101	a two-letter prefix and three digits.	W06-S02
asset_type	The type of assest; determines destination department	STREETLIGHT	STREETLIGHT, DRAIN or BRIDGE.	W06-S02
finding_code	Short description of the inspection issue	LAMP_OUT	LAMP_OUT, BLOCKED or SURFACE_DAMAGE.	W06-S02
priority	Determines the urgency with which the matter requires attention	ROUTINE	ROUTINE or URGENT	W06-S02
captured_at	UTC capture time	2026-10-14T09:00:00Z	YYYY-MM-DDTHH:MM:SSZ.	W06-S02
photo_ref	A photo image of the inspected area	IMG-601	IMG- followed by three digits	W06-S02
survey_area	The relative location of where the survey was conducted	NORTH	NORTH, CENTRAL or SOUTH.	W06-S02

Finding: Three of the accepted reports (CJ-603, CJ-604, and CJ-607) were received by the wrong destination [W06-S02, W06-S04]. All three mentioned reports were a BRIDGE asset type which according W06-S03 are supposed to be routed to the Structures department; they instead were routed to the Electrical Department [W06-S04].
Unanswered question: What was the technical cause of the discrepancy between the three misrouted reports in W06-04 and the expected route outlined in W06-S03.
